Program Details
happyNCLEX.com

This program is very different from any other test prep. It’s designed so you do not have to repeat. You’re going to learn the problem-solving skills required by the National Board. NCLEX is a game you can learn to play. You’ll enjoy the training. And I’ll be very happy to see you PASS.

Joan Palmeri, NCLEX Whisperer

All training is accessed online. Even live sessions and coaching. It’s just like in-person training only better because you don’t have to travel.

There are THREE Steps to training.

STEP ONE gives you the basics for problem-solving and critical-thinking skills. You’ll learn the basics of how questions are designed, how keywords work, and strategies for SATA and other alternate-formats.

STEP TWO gives demonstrations and research-based instructions for you to practice questions on your own. You will learn to handle NCLEX questions by my demonstrations and I coach you through your home practice to discuss improvement and troubleshoot what needs improvement.

Qbanks are used for Home Practice in STEPS 2 & 3. If you don’t have a Qbank, I have links to free ones.

STEP THREE is designed to sharpen your problem-solving skills in the most important concept area for NCLEX success- prioritizing.

The OPEN PASS is active for up to 6 weeks. The average time needed to learn and practice the required problem-solving skills is 4 weeks. Much progress can be made in 3 weeks. If you have a full-time works schedule and family responsibilities, you might need the full 6 weeks.
